Objective

I am an experienced web developer looking forward to continuing my career on exciting and challenging projects. I am eager to increase my skills and develop new abilities, especially in the fields of project management, mobile development and social media technologies and strategies.

Technical skills

Languages

Proficient in: C#, PHP, T-Sql, javascript

Familiar with: Java, C, bash scripting

Software & Technologies

Database: MySQL and Microsoft SQL Server

Platforms: Microsoft Windows, Linux (especially Debian based). Microsoft TFS, IIS 7.0 basic administration, LAMP stack administration.

Frameworks: Proficient in ASP.NET (3.5, 4.0), WebForms and MVC 2, LINQ to SQL, JQuery.

Amongst others, I have been using NHibernate, Entity Framework, NUnit, PHP Pear.

Work Experience

Web Developer

NTS S.r.l. – Torino, Italy

<http://www.ntsweb.it/>

<http://lab10100web.wordpress.com/>

March 2010 – Present

I developed, designed and maintained a number of web-based projects, both independently or in team with other developers, web designers and analysts.

I designed and developed a number of web-based applications supporting the organization of events and conventions. One of the biggest project aimed to logistically support the travel and accommodation in Greece of more than 800 financial advisors for an incentive event.

I developed two websites for Samsung Italia. Those sites have been used by more than 6000 between retailers, wholesalers and agents to register products, collect points and claim prizes.

I designed and developed a CMS and website for Ernst & Young to be used by a government organization.

I designed and developed two web based ticketing systems to be used respectively by Vodafone Italia and Fiat Abarth. The first was intended to keep track of the delivery and movements of showcase material to and between dealers; the second to support the carmaker's dealership helpdesk.

University Internship

Futura NT S.r.l. – Torino, Italy

July – September 2009

Integration of software of revision control (svn), issue tracking (Mantis) and document management (dokuwiki), enabling a single sign for authentication /authorization and centralized administration. The internship has been the subject of my academic monograph.

PHP/ASP.NET Web developer

September 2008 – April 2009,
December 2010 – March 2011

Futura NT S.rl. – Torino, Italy

<http://www.volleyball.it>

Designed and developed a renewed CMS and website for volleyball.it, the most important Italian news site about volleyball. The site ran on a LAMP platform.

Maintained and added functionalities to a management software in ASP.NET for a leading multinational corporation in production and distribution of special purpose gases.

Collaborated in the development and maintenance of a number of smaller web-related projects
